The Heart of Candracar

When Will Vandom moves to Heatherfield and a new school, Sheffield Institute, she soon makes friends with Irma Lair, Taranee Cook, Cornelia Hale and Hay Lin.

Five ordinary girls in an ordinary school, they quickly become the closest friends you'll ever meet - but their friendship is not accidental. When they're together, strange things start happening to them. They begin to wonder, did they meet by chance or is there a stronger force at work?

Then Will is given a rare medallion, the Heart of Candracar, and is revealed to be its special Guardian. The other girls discover their own extraordinary powers too, as the Guardians of the elements earth, air, water and fire.

Together they are W.I.T.C.H. and combine to form a friendship more powerful than they could ever have imagined!

AMULETS

Will's amulet, or lucky charm, is the Heart of Candracar. It may look like any old pendant, but Will's amulet reminds her that the most magical part of herself is inside, ready to be called on at any time.

Do you have a lucky charm? It can be anything, but it must follow this simple rule – your lucky charm must be found or given to you as a gift. Why? Easy! Because it must find you, not the other way round! Don't forget that the secret of an amulet's strength is ...

Imagination!

Good LUCK? It's believing you are lucky!

Legend has it that keeping a coin minted in the year of your birth will bring you lots of money. (Attention all mums and dads!)

Catch a falling leaf and keep it for good luck. (Don't do it at school though because if a cute boy's around you're bound to trip over!)

Wear an item of clothing inside out for a whole day and it'll bring you good luck! (You might even start a new trend – you never know!)

A SMILE will always bring you GOOD LUCK

The power of WATER

... it's truly magical!

Irma knows how powerful water can be. Its magic qualities mean that it can appear in many differe forms – a sparkling liquid, solid ice and even steaming vapour. Whatever its form, the power water can make the most amazing things happen. Water is ...

... essential for the life of plants and animals.

... fantastic fun! Like the first swim of the summer in the sea or diving and playing with friends.

... luxurious, as a hot and steamy sauna.

... as refreshing as a mountain stream.

Water is a great cleanser – and not just for the body. Bad thoughts can also be washed away with a shower or a warm bath.

BE CONFIDENT

Strange but true – almost everyone feels shy at some point. Time plays a very important part in making us feel more secure but remembering the simple points below will help you feel more positive and confident, straight away!

The magic of wishing is very powerful!

Don't give up before you begin

If you want something – ask for it. Don't imagine that the answer will be "no" before you've even asked! Remember, you can do anything you set your mind to – you just have to believe!

Put yourself in the other person's place

Everyone feels insecure when they don't know what to say or how to do something. Thinking that everyone is a little bit frightened will help you feel more at ease and less alone.

Stay positive

Imagine what you wish to happen and think about that. Having a positive attitude will help you stay confident. If something cringey happens, try to see the funny side and have a giggle with your friends.

Stand up and battle for WHAT YOU BELIEVE IN

Truly magical

It's raining outside and you don't know what to do with your friends? The W.I.T.C.H. girls are here to teach you some magic tricks for an enchanting afternoon!

The magic cards

You will need:

A pack of cards and some friends to see your 'powers'!

This trick is simple but very effective. Here's how to do it:

Split the pack of cards into three or four piles and place them on the table.

Ask a friend to choose one of the piles. Then, casually, start counting the number of cards in the pile.

Pretend to be concentrating and recite the following magic words: Fire ... Little fire ... Come close to me ... Help my art ... Increase the number of my cards ...

Give the pile back to your friend, asking her to count the cards again. WOW! Hey, Presto! The number of cards has increased and, of course, it's all down to your powers!

Solution:

When you count the cards for the first time, take one card from the bottom of the pile every now and then (making sure nobody notices) and count it with the one that is visible to the audience. This way, at the end of the counting, you will have more cards in the bunch than those the audience has heard you count out loud, and that they therefore believe to have seen in your hands!

W.I.T.C.H. tricks

Long-distance reading

You will need:

A dictionary, two toothpicks and an audience.

Here's how to impress your friends:

Hand a toothpick to a person in the audience.

Leave the room and after a while come back with a dictionary in your hand.

Casually walk towards the friend who has the toothpick and ask her to place it between any two pages of the dictionary.

Walk towards another person in the audience and give her the dictionary.

Now fake an intense concentation, wave your hands in the air, whisper something incomprehensible and ... you will be able to tell her the first words on each of the two pages the toothpicks were placed between!

Solution:

Of course you don't need magic powers to do this number. All you need is a little craftiness. Before you start, insert another toothpick inside the dictionary, making sure you don't forget the first word in each of the two pages. Casually take off the toothpick placed inside the dictionary by your unsuspecting friend to obtain the desired result.

YOGA: Control

YOGA increases your energy flow, improves your poise, strengthens your body and relaxes your mind.

Totally cool! READY?

Let's begin ...

Look at the pictures and try these basic yoga poses. You'll see, they're less complicated than they seem, except for their names (to be pronounced in public only after a lot of practice!)

or "the easy pose"
by Hay Lin

Sit up straight with your legs crossed and your head up. Place your hands on your knees, palms upwards. Breathe deeply, closing your eyes. Relax.

This pose lengthens the spine and is good for inner calm. It's best after a stressful lesson in maths or history!

your energy

Shavasana
or "the relaxation pose"
by Taranee Cook

Lying on your back, let your arms and legs drop open, palms up. Relax. Breathe deeply and imagine you are at the seashore, listening to the lapping of the waves and the sound of the wind.

This pose is totally relaxing. Your breathing becomes calm and regular. 10 minutes of this exercise are worth 8 hours' sleep (tell your mum this when you want to stay up to watch your favourite TV programme!)

2

Bhujangasana
or "the cobra pose"
by Irma Lair

Lie flat on the floor. Put your hands under your shoulders. Lift your chest off the floor slowly, using your back muscles (not your arms). Hold the pose as long as you can, breathing easily. Then, slowly let yourself back down to the floor.

This pose re-awakens the energy lying within us. It's especially good on a Monday morning, when your body just won't wake up!

3

Ardha-Matsyendrasana
or "the lord of the fishes pose"
by Cornelia Hale

Sit on the floor with your legs straight out in front of you. Slide your right foot under your left thigh. Place your left foot over your right knee. Turn your torso to the left, place your right elbow on your left knee and press your left hand against the floor. Hold this pose as long as you can, then relax.

This pose stretches your shoulders and improves your posture. It's great for aspiring models and anyone who isn't afraid of getting tangled up!

THE POWER OF EARTH
The power to open passageways in
rock or the ground, create interconnecting
stone tunnels, absorb gold and diamonds, any
kind of vegetation, plus the power to
move objects with my mind

HI, I'M CORNELIA

- My star sign is Taurus
- My birthday is May 10th
- I'm pretty confident and love to be up to date with the latest fashion
- I'm quiet, but when I say something I generally hit the nail on the head
- I love ice skating
- I have a fear of water and enclosed spaces
- I own a cat called Napoleon
- My favourite colour is green

AS A W.I.T.C.H.

- I control the power of earth
- I can sense the planet's lines of force
- I can move objects just by thinking

MY POWER IS EARTH

Keep your HEAD UP and FEET FIRMLY ON THE GROUND

When things go wrong ...

DON'T PANIC!

The unexpected is always waiting to jump out at you – just when you expect it least. Whatever shocks come your way, try to remember these three W.I.T.C.H. tips –

Don't fear change

Change happens because nothing can stay the same forever. Feeling sad because of a change is normal because it's hard to leave what you know behind. Try to remember, though, that change often brings excitement instead of sadness – so enjoy the change and who knows what may happen!

Develop know-how

Developing know-how will help you to pull yourself out of all kinds of tricky situations much more easily. The basic rule is to do the right thing, at the right time, thinking of everyone else's feelings around you.

Give yourself another chance

You did all you could but it still didn't happen in the way you'd hoped. First of all, try not to let it get you down. Think of what you've learned from the experience and then move on. There will be plenty of other occasions, just around the corner, for you to prove how great you are!

For you, breaks are magical. They give you a chance to hear all the latest gossip and jokes about your mates and teachers.
